Kepler checked the dating of the
Crucifixion, at which there had been
'darkness over all the land' against the
eclipse tables, found an error of
four years, and had to set back
the birth of Christ to 4 B.C. This in
turn gave the Creation the century
date of 4004 B.C. After and equally pious
scientists had other ideas, but the range

of difference was only from 3946 to
4032 B.C.
